DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chalmers.

Chalmers discloses the same invention including a mixing tube (87) comprising a body (Fig. 2) having a bore extending therethrough along a longitudinal axis (88), a collar rigidly fixed to an outer surface of the mixing tube in an upper region of the mixing tube (93), that the collar being sized to slide upward through a bore of a cutting head and locate the mixing tube in a desired position (Fig. 9), that a distance from the top surface of the mixing tube body to a bottom surface of the collar is 0.02-2.0 inches (Fig. 9), that the wall thickness of the collar is 0.01-0.2 inches (Fig. 9), that the outer surface of the collar is substantially cylindrical (94), and that the outer surface of the collar is substantially frusto-conical (93).

3. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Gigantino et al.

Gigantino et al. discloses the same invention including a mixing tube (Fig. 4) having a mixing tube body with a longitudinal bore extending therethrough defining an inlet (26) and an outlet (53), and a first cylindrical region of the mixing tube body

Application/Control Number: 10/717,744

Art Unit: 3724

adjacent the inlet having a first outer diameter (25) that is less than a second outer diameter of the mixing tube body downstream of the first cylindrical region (28).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chalmers in view of Fredrick. Chalmers discloses the invention but fails to disclose that the collar is surrounded by a nut and an outer surface of the nut being threaded to engage an threaded inner surface of a cutting head. Fredrick teaches a collar (18') that is surrounded by a nut (16') and an outer surface of the nut being threaded to engage a threaded inner surface of a cutting head (26'). Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have provided Chalmers collar/nut apparatus, as taught by Fredrick, to provide a more efficient connection between the mixing tube and the cutting head.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hashish et al. ('111), Yie, Hashish et al. ('429), Lloyd, Warehime, Bruns et al., Pao et al., Hubner et al., and Allard.

Application/Control Number: 10/717,744

Art Unit: 3724

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Prone whose telephone number is 703-605-4287. The examiner can normally be reached on 7:30-5:00, Mon - (every other) Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on 703-308-1082. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
